SAMWEL OMOGA ABWAO

Software Engineering Student (Year 3) | Multimedia University of Kenya

+254 768 795 336 | samhuit770@gmail.com | github.com/AbwaoSam | Nairobi, Kenya

PROFESSIONAL SUMMARY

Driven Software Engineer with practical experience building responsive web applications and native Android solutions. Proficient in React, Tailwind CSS, JavaScript, Kotlin (Jetpack Compose), and backend integrations. Proven ability to collaborate with international teams and deploy production-ready applications.

TECHNICAL SKILLS

Web Development:	React, Tailwind CSS, JavaScript (ES6+), Node, Express, HTML5, CSS3, Netlify, Vercel, TypeScript
Mobile Development:	Kotlin, Jetpack Compose, Coroutines, MVVM, LiveData, Android SDK
Libraries & Frameworks:	Hilt DI, Retrofit, Room Database, Ktor, Supabase, Chart.js
Languages:	Kotlin, JavaScript, Java, Python, SQL
Developer Tools:	Git, GitHub, Android Studio, VS Code, IntelliJ IDEA, PyCharm, Postman

FEATURED PROJECTS

Victoria Falls Regional Institute Web Platform | *React, Tailwind CSS, Vercel* **August 2026**

- Collaborated in engineering a modern web platform for a regional think tank focused on African policy and research.
- Built dynamic program pages, news and publication hubs, and interactive inquiry forms for streamlined routing.
- Structured fully responsive UI styling using Tailwind CSS, ensuring pixel-perfect rendering across mobile and desktop devices.
- Deployed staging environments on Vercel to enable continuous integration and client review workflows.
- Deployment live at: https://vfrigreenmustard-k8ilodao5-tj-57-s-projects.vercel.app

Nexus News Application | *Kotlin, Jetpack Compose, Hilt, Room*/ May 2026

- Architected and released a production-ready Android application fetching real-time news via NewsData.io API.
- Implemented Room Database for offline caching and bookmarking capabilities with clean MVVM architecture.
- Leveraged Hilt Dependency Injection across ViewModels and data layers for maintainable code structure.
- Features: Full-text search, multi-continent filtering, category sorting, and optimized 9.9 MB APK delivery.
- Open-source code available at: https://github.com/AbwaoSam/Nexus
- Release available at: https://github.com/AbwaoSam/Nexus/releases/tag/v1.0.0

Family Chama Contribution Web App | *JavaScript, Supabase, Chart.js, HTML/CSS* February 2026

- Engineered a financial management portal tracking monthly member contributions with real-time visual analytics.
- Integrated Supabase database backend for authenticated user sessions, role-based access, and data consistency.
- Built administrative features including M-Pesa payment logs, manual audit verification, and CSV export reporting.
- Deployment live at: https://abwao-familychama.netlify.app/

ADDITIONAL PROJECTS & TECHNICAL WORK

- WhatsApp Payment Bot: Interactive bot built using Twilio API integration (Ongoing).
- Library Management System: Responsive group project web platform for campus library workflows.
- AI / Algorithms: Constraint satisfaction map coloring and MNIST handwritten digit classifier in Python.

EDUCATION

Bachelor of Science in Software Engineering (Year 3) — Multimedia University of Kenya **Expected Graduation: 2028**
Relevant Coursework: Object-Oriented Programming, Database Systems, Data Structures & Algorithms, System Analysis & Design, Foundations of AI.

LEADERSHIP & SOFT SKILLS

- Self-Driven Developer: Independently mastered full Android (Kotlin/Compose) and modern web stacks (React/Tailwind).
- Community & Collaboration: Active participant in Google Developer Groups (GDG) and peer technical mentorship.
- Best Practices: Focused on clean architecture, modular design patterns, and clear code documentation.
